You must have:

Mathematical Formulae and Statistical Tables (Blue)

Total Marks

--

Candidates may use any calculator allowed by the regulations of the Joint Council for Qualifications. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B). Coloured pencils and highlighter pens must not be used.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided – *there may be more space than you need.*
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- When a calculator is used, the answer should be given to an appropriate degree of accuracy.

Information

- The total mark for this paper is 125.
- The marks for **each** question are shown in brackets – *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

PEARSON

1.

$$f(x) = 3x^2 + x - \frac{4}{\sqrt{x}} + 6x^{-3}, \quad x > 0$$

Find $\int f(x) dx$, simplifying each term.

(5)

DO NOT WRITE IN THIS AREA

5. (a) Find the first 4 terms, in ascending powers of x , of the binomial expansion of

$$\left(3 - \frac{ax}{2}\right)^5$$

where a is a positive constant. Give each term in its simplest form. (4)

Given that, in the expansion, the coefficient of x is equal to the coefficient of x^3 ,

(b) find the exact value of a in its simplest form. (3)

6. A sequence is defined by

$$u_1 = 36$$
$$u_{n+1} = \frac{2}{3}u_n, \quad n \geq 1$$

- (a) Find the exact simplified values of u_2 , u_3 and u_4 (2)
- (b) Write down the common ratio of the sequence. (1)
- (c) Find, giving your answer to 4 significant figures, the value of u_{11} (2)
- (d) Find the exact value of $\sum_{i=1}^6 u_i$ (2)
- (e) Find the value of $\sum_{i=1}^{\infty} u_i$ (2)

Q6

(Total 9 marks)

7. (a) Sketch the graph of $y = 3^{x-2}$, $x \in \mathbb{R}$
 Give the exact values for the coordinates of the point where your graph crosses the y -axis. (2)

The table below gives corresponding values of x and y , for $y = 3^{x-2}$
 The values of y are rounded to 3 decimal places where necessary.

x	0.5	1	1.5	2	2.5	3
y	0.192	0.333	0.577	1	1.732	3

- (b) Use the trapezium rule with all the values of y from the table to find an approximate value for

$$\int_{0.5}^3 3^{x-2} dx$$

Give your answer to 2 decimal places.

8.

Figure 1

The compound shape $ABCD$, shown in Figure 1, consists of a triangle ABD joined along its edge BD to a sector DBC of a circle with centre B and radius 6 cm. The points A , B and C lie on a straight line with $AB = 5$ cm and $BC = 6$ cm. Angle $DAB = 1.1$ radians.

- (a) Show that angle $ABD = 1.20$ radians to 3 significant figures. (4)
- (b) Find the area of the compound shape, giving your answer to 3 significant figures. (4)

9. In a large theatre there are 20 rows of seats.

The number of seats in the first row is a , where a is a constant.

In the second row the number of seats is $(a + d)$, where d is a constant. In the third row the number of seats is $(a + 2d)$, and on each subsequent row there are d more seats than on the previous row. The number of seats in each row forms an arithmetic sequence.

The **total** number of seats in the first 10 rows is 395

(a) Use this information to show that $10a + 45d = 395$ (1)

The **total** number of seats in the first 18 rows is 927

(b) Use this information to write down a second simplified equation relating a and d . (2)

(c) Solve these equations to find the value of a and the value of d . (3)

(d) Find the number of seats in the 20th row of the theatre. (2)

Question 9 continued

12.

Diagram not drawn to scale

Figure 2

Figure 2 shows a sketch of the curve with equation $y = f(x)$, where

$$f(x) = \frac{x^3 - 9x^2 - 81x}{27}$$

The curve crosses the x -axis at the point A , the point B and the origin O . The curve has a maximum turning point at C and a minimum turning point at D .

(a) Use algebra to find exact values for the x coordinates of the points A and B . (4)

(b) Use calculus to find the coordinates of the points C and D . (6)

The graph of $y = f(x + a)$, where a is a constant, has its minimum turning point on the y -axis.

(c) Write down the value of a . (1)

14.

Figure 3

Figure 3 shows a sketch of the curve C with equation $y = -x^2 + 6x - 8$. The normal to C at the point $P(5, -3)$ is the line l , which is also shown in Figure 3.

- (a) Find an equation for l , giving your answer in the form $ax + by + c = 0$, where a , b and c are integers. (5)

The finite region R , shown shaded in Figure 3, is bounded below by the line l and the curve C , and is bounded above by the x -axis.

- (b) Find the exact value of the area of R . (6)

(Solutions based entirely on graphical or numerical methods are not acceptable.)
