**Pearson Edexcel International Advanced Level**

**Tuesday 23 May 2023**

Morning (Time: 1 hour 30 minutes)

Paper  
reference

**WST02/01**

**Mathematics**

**International Advanced Subsidiary/Advanced Level  
Statistics S2**

**You must have:**

Mathematical Formulae and Statistical Tables (Yellow), calculator

Total Marks

**Candidates may use any calculator permitted by Pearson regulations. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.**

### Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided  
– *there may be more space than you need.*
- You should show sufficient working to make your methods clear.  
Answers without working may not gain full credit.
- Values from the statistical tables should be quoted in full. If a calculator is used instead of the tables, the value should be given to an equivalent degree of accuracy.
- Inexact answers should be given to three significant figures unless otherwise stated.

### Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 7 questions in this question paper. The total mark for this paper is 75.
- The marks for **each** question are shown in brackets  
– *use this as a guide as to how much time to spend on each question.*

### Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.

Pearson

3. The continuous random variable  $X$  has probability density function given by

$$f(x) = \begin{cases} \frac{1}{48}(x^2 - 8x + c) & 2 \leq x \leq 5 \\ 0 & \text{otherwise} \end{cases}$$

- (a) Show that  $c = 31$  (3)
- (b) Find  $P(2 < X < 3)$  (2)
- (c) State whether the lower quartile of  $X$  is less than 3, equal to 3 or greater than 3  
Give a reason for your answer. (1)

Kei does the following to work out the mode of  $X$

$$f'(x) = \frac{1}{48}(2x - 8)$$
$$0 = \frac{1}{48}(2x - 8)$$
$$x = 4$$

Hence the mode of  $X$  is 4

Kei's answer for the mode is incorrect.

- (d) Explain why Kei's method does not give the correct value for the mode. (1)
- (e) Find the mode of  $X$   
Give a reason for your answer. (2)
